Who owns Adden Energy?

Adden Energy was incorporated in 2021 and, in early 2022, received its first round of venture funding from Primavera Capital Group, Rhapsody Partners, and MassVentures. The ownership of Adden Energy is held by its investors: Primavera Capital Group, Rhapsody Partners, and MassVentures.

What is Adden energy?

Based on solid-state battery technology originally developed at Harvard, Adden Energy combines two technologies that have long been goals of the EV industry - lithium metal and fast charging. Lithium metal has the highest energy density of any battery material, offering longer driving range and lower costs than current batteries.

How did Adden energy raise \$15m in a series a round?

To scale production and bring this technology to car manufacturers, the company has raised \$15M in a Series A round led by At One Ventures. "Current EVs work great for people like me - those with at-home charging whose driving consists of short commutes and an occasional road trip," explained Adden Energy Co-Founder and CEO Will Fitzhugh.

Adden Energy is scaling up a new type of solid-state battery, initially developed by a team of scientists at Harvard University, to commercially relevant cell sizes. With demonstrated charge times as low as 3 minutes and capacity retention for over 10,000 cycles in a lab-scale cells, Adden Energy's scaling of this technology would contribute ...

Adden Energy was founded in 2021 by a team of Harvard scientists, alumni, and venture capitalists, led by Professor Xin Li. In 2015, doctoral students William Fitzhugh and Luhan Ye began the initial research ...

List of Adden Energy's institutional investors. At One Ventures, located in San Francisco (United States), made their first investment in Adden Energy on Aug 30, 2024 in its Series A round.; Primavera, located in Beijing (China), made their first investment in Adden Energy on Sep 01, 2022 in its Seed round.; Rhapsody Venture Partners, located in Cambridge ...

Adden Energy - Provider of solutions for solid state batteries. Raised a total funding of \$20.1M over 3 rounds from 5 investors. Founded by William Fitzhugh in the year ...

Adden Energy has developed lithium-metal solid-state battery technology that solves these issues. To scale production and bring this technology to car manufacturers, the company has raised \$15M...

Adden Energy's technical advances have spanned materials design and synthesis, in-house solid-electrolyte development, and novel cell designs. These combined material and device innovations have enabled the

demonstration of ...

Adden Energy is developing solid-state batteries for automotive and consumer applications and is located in the Boston Area. Our technology is based on leading research from Harvard University and our team is backed by prominent venture capital investors. We are looking for a Materials Chemist to j

Adden Energy | 3,986 followers on LinkedIn. A Harvard University spin-off commercializing novel solid-state battery technology | The problems posed by climate change need no introduction - it is ...

Adden Energy raises \$15 million in Series A funding led by At One Ventures to scale its self-healing lithium-metal solid-state batteries. Adden Energy raises \$15 million in Series A funding led by At One Ventures to scale its self-healing lithium-metal solid-state batteries, aiming to overcome key barriers in electric vehicle adoption.

Adden Energy is a developer of stable, lithium-metal, solid-state batteries. With demonstrated charge times as low as 3 minutes and capacity retention for over 10,000 cycles in a lab-scale cell, Adden Energy develops cutting-edge technologies to enable mass adoption of EVs around the world and contribute greatly to a cleaner future.

Adden Energy Announces World's Fastest Lithium Metal Battery Has Achieved Breakthrough Low Temperature Performance - May 13, 2024. Press Release. Adden Energy Awarded Competitive Grant from the U.S. National Science Foundation - May 6, 2024. Independent. Battery breakthrough that could slash price of electric cars - January 24, 2024. ...

According to Adden Energy, the self-developed lithium metal battery achieves a charging time of only three minutes in the laboratory and a service life of more than 10,000 cycles. The prototype also has a high energy density and material stability "that overcomes the safety problems of some other lithium batteries".

Adden Energy, founded by a team of scientists at Harvard University, is developing and scaling up a brand-new type of solid-state battery. With demonstrated charge times as low as 3 minutes ...

Contact us. If you have any questions or comments, or you're interested in learning more about the team or investing, please send us a message using the contact form.

With demonstrated charge times as low as 3 minutes and capacity retention for over 10,000 cycles in a lab-scale cell, Adden Energy is developing cutting edge technologies to enable ...

Adden Energy is one among many solid state battery innovators to overcome the ion movement hurdle, and they have also come up with a vigorous solution to the problem of dendrite formation, to boot ...
