

HBA provides focused and complementary multi-disciplinary services to the Offshore Oil & Gas, as well as Renewable energy sectors worldwide. HBA has rapidly established itself as a pioneer in energy transition by adapting its established offshore knowledge, expertise, and technologies to the offshore Renewable industry.

HBA Consultancy has established strategic partnerships with prestigious companies such as Shell & Eni (Rina) in Albania and Elite Drilling Company (QatarEnergy drilling contractor) in the Dukhan field in Qatar.

The AEA Albania Energy Association was established in 2011 as not-for-profit industry association to represent Albanian and international energy producers, consumers and promote the use of sustainable energy in Albania and West Balkan.

HBA provides focused and complementary multi-disciplinary services to the Offshore Oil & Gas, as well as Renewable energy sectors worldwide. HBA has rapidly established itself as a pioneer in energy transition by adapting its ...

2 ???· This marks the third phase of Albania's energy market liberalization, a process that began in 2015 to align with European standards. The change will impact businesses connected to 10-kilovolt power lines, requiring them to leave the regulated market. These companies must now sign contracts with one of 36 licensed suppliers, including private ...

HBA Consultancy has two HSE consultancy provisions contracts for two Big International Energy Companies (Shell & Eni) in Albania. Following is a description of our project methods, including how the project will be developed, a proposed timeline of events, and reasons why we suggest developing the project as described.

The country's renewable energy expansion to date has been mainly driven by the deployment of its hydropower capacity. Hydropower is the second largest contributor to Albania's primary energy supply, after fossil fuels, and accounts for almost entirely the country's electricity generation.

Various forms of biomass resources are available in Albania to cover energy services related to heating, electricity generation and transport. Firewood, agricultural waste, biomass pellets and biogas can contribute to a very important part of the energy demand to provide thermal energy in the framework of meeting the objectives from RES. 2.-

Our strategy is to work closely with the Albanian government, national and international energy agencies, the oil and gas industry, renewable energy players, companies, and investors to increase sustainable energy and power generation in Albania and the WB-West Balkans.
