Given Bahrain's climate, solar energy is a vital part of the kingdom's clean energy mix, accounting for 93% of its renewable capacity in 2020. In November 2021 the government inaugurated the Batelco solar plant, which can produce some 1600 MW of power and is expected to reduce the country's carbon emissions by around 900 tonnes.

Bahrain is making strides in its transition to renewable energy, with the government setting an ambitious target of achieving 20 per cent reliance on solar power by 2035, a minister has said.

The Kingdom of Bahrain, through the Electricity and Water Authority, provides support for renewable energy projects. It also offers a financing program through financing banks to enable individuals and investors to start renewable energy projects.

In the next 60 days, the Kingdom of Bahrain's energy sector will achieve a pivotal milestone as Bapco Refining, a subsidiary of Bapco Energies, embarks on an important phase of its refinery modernization startup journey. This is a historical step toward reinforcing Bahrain's position as a leader in energy innovation.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided
