

Why should you choose cubic modular?

Whenever the need for a safe and efficient power distribution is needed, the CUBIC Modular system is the answer. The modular thinking behind our signature enclosure system makes it possible to build every type of switchboard solution in the low-power segment, based on several standard parts, without compromising on quality.

What is a cubic modular system?

The versatility of the modular system makes it easy and quick to assemble and install electrical panels as well as to extend and/or modify existing panels - including older enclosures. The CUBIC modular system provides numerous possibilities for construction of tested panels.

What is a modular switchboard?

The modular system can be used in many situations, where electrical switchboards are a necessity to ensure the operation of electrical equipment. Depending on the end user's requirements CUBIC offer several options based on the modular system. For example, Multi Drawer, Plug-in, MPI inserts Cu-mini.

What is modular system?

The Modular System is extensively tested by leading and independent test laboratories. This ensures a high validity of our assertions and ensures a documentation and independency, on which all stakeholders can rely. The Modular System is verifiable according to the IEC/ EN 61439 standard.

Why should you choose a modular switchboard system?

As an inherent part of the modular idea is the freedom to choose power components from any supplier. This allows for the construction of just the right switchboard for your need. On top of the versatility of the modular system it is also one of the safest and most tested enclosure systems on the market.

How big is a cubic module?

The main module of the CUBIC modular system is 192 mm, which is remarkable for being divisible by 12 figures without decimals. During the construction of a panel, logical main and sub modules are used so that the fitter need not take millimetres into consideration. All fitting is done by means of only very few tools.

CUBIC-Modulsystem A/S | 8,365 followers on LinkedIn. The Power of Modular Thinking. | CUBIC was founded in 1973 based on a unique idea for a modular system for the construction...

Rockwell Automation, Inc. (NYSE: ROK), the world's largest company dedicated to industrial automation and digital transformation, announced that it has completed the acquisition of CUBIC, a company that specialises in modular systems for the construction of electrical panels.
