

Cosmic electric power Sudan

How much electricity is consumed in Sudan?

It is estimated that the total installed generation power capacity in Sudan in 2013 amounted to 2,533 MW, with about 70% of the electricity being consumed in the Khartoum area. Domestic power consumption dominates the market, with approximately 65% of electricity consumption being attributable to the sector.

How can Sudan achieve energy self-sufficiency?

Encouraging solar and wind power in the country's energy portfolio could help Sudan achieve its goal of energy self-sufficiency. Egyptian policies such as nurturing and promoting renewable technologies and scientific research, feed-in tariffs, and tax exemptions could help Sudan achieve its objectives.

What is power in Sudan?

Power in Sudan Sudan is a country with immense renewable energy potential, possessing a high hydropower potential based totally on its location on the river Nile and other watersheds, a high wind speed mainly in its northern and western region, and high solar radiation throughout the country.

Does Sudan have a problem with electricity supply?

Sudan is currently facing a major problem with electricity supply. According to the report "Tracking SDG 7: The Energy Progress Report (2021)", only 54% of the population in Sudan have access to electricity; this indicates more than 20 million people aren't connected to the national electricity grid.

Why does Sudan import electricity from neighboring countries?

Therefore, Sudan imports electricity from neighbouring countries, such as Ethiopia (200 MW) and Egypt (78 MW), to make up for the shortfall. The agreement with Egypt stipulates that Egypt will export electricity to Sudan in exchange for goods such as food crops and animal protein.

What is the main source of electricity in Sudan?

Hydroelectricity is Sudan's largest source of on-grid power, accounting for 68% of generation in 2011, followed by diesel and heavy fuel oil (27%) and biomass and waste (5%). Hydroelectricity is generated from five dams at Roseires, Sinnar, Jebel Aulia, Khashm el-Girba, and Merowe.
