Finnish solar panel installers - showing companies in Finland that undertake solar panel installation, including rooftop and standalone solar systems. 134 installers based in Finland are listed below.

In Finland, it is possible to get a household deduction for the installation costs of a solar panel system. The reduction is 40% of the installation work costs and the maximum amount is EUR2,250/person per year.

Solar panel prices in Finland. In Finland, the prices of solar panels have dropped significantly in recent years, which has made them an even more attractive option for households and companies. On average, the price of an installed solar panel system is around 1,200-1,800 euros per kilowatt (kW). This means that, for example, a 5 kW system ...

Rooftop arrays currently cost between 1,300 and 2,000 euros. Off-grid installations equipped with batteries cost between 3,500 euros and 5,000 euros per kilowatt. In Finland, self-consumption of solar energy is exempt from grid charges and electricity taxes (up to a maximum of 800 megawatt hours per year).

Energy independence: With a solar power system, you become less reliant on the fluctuations of the electricity grid, especially during peak hours. Government support: Finland offers financial incentives for installing solar panels, such as a 40% tax deduction on installation costs and the possibility to sell excess electricity back to the grid.

You can use Helen's solar power calculator to find out how much solar energy you could produce by mounting panels on your roof. The calculator takes into account any shade hitting your roof, such as other buildings and trees. For a detailed estimate of the best solar panel solution for you, please order a survey.
