

What is a Varta pulse neo?

The VARTA pulse neo offers the highest energy density in the smallest possible spaces. This means that the wall-mounted storage system is also ideal for smaller homes. When required, you can expand the storage capacity afterwards by connecting up to six VARTA energy storage systems without additional hardware.

How to maintain the Varta pulse neo energy storage system?

The maintenance of the VARTA pulse neo energy storage system includes: „ Service means inspection and maintenance. „... Page 51 „, Check whether the wall fastening is stable. If necessary, tighten the screw or replace it. Checking the system parameters The system parameters are checked via the web interface. For this, see chapter 13.

Is the Varta pulse neo suitable for retrofitting?

As an AC all-in-one system with an integrated battery inverter, the VARTA pulse neo is perfectly suitable for retrofitting as well as for new installations. For the second year in a row our customers have voted us "product of the year" in the category "energy" 1 in the haustec.de readers' poll with the VARTA pulse neo.

Is VARTA a 'product of the year'?

For the second year in a row our customers have voted us "product of the year" in the category "energy" 1 in the haustec.de readers' poll with the VARTA pulse neo. The VARTA pulse neo offers the highest energy density in the smallest possible spaces. This means that the wall-mounted storage system is also ideal for smaller homes.

What is the capacity of VARTA pulse neo expansion stage?

Page 17 Unlock code label Technical parameters VARTA pulse neo expansion stage Nominal capacity 3.3 kWh 6.5 kWh AC charging power 1.8 kW 2.5 kW AC discharging power 1.6 kW 2.3 kW Battery converter layout without isolating transformer Dimensions in mm (W x H x D) 600 x 690 x 190 Weight (incl.

What safety equipment is included in a Varta neo energy storage system?

Page 13 VARTA Storage. The VARTA pulse neo energy storage system has several pieces of safety equipment. These include grid and system protection e.g. according to VDE-AR-N 4105, closed electrical operating area, over-temperature switch-off and a mechanical switch-off mechanism.
