

# Energy energy Bahrain

What is the energy situation in Bahrain?

Energy in Bahrain refers to the energy and electricity production, consumption, and import in the country. Bahrain is a net energy exporter. The primary energy use in Bahrain was 110 TWh and 139 TWh per million persons in 2009, and 107 TWh and 139 TWh/million people in 2008.

Is Bahrain an energy importer?

Bahrain is a net energy exporter. It was the first place on the Arabian side of the Persian Gulf where oil was discovered, and the First Oil Well, located below Jabal al Dukhan, has operated since 1932. Primary energy use in Bahrain was 110 TWh and 139 TWh per million persons in 2009, and 107 TWh and 139 TWh/million people in 2008.

Is biomass a source of electricity in Bahrain?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Bahrain: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Is Bahrain a self-sufficient country?

Bahrain could be self-sufficient with domestically produced energy. The total production of all electric energy producing facilities is 31 bn kWh, which is 101 percent of the country's own usage. Despite this, Bahrain trades energy with foreign countries. Along with pure consumption, the production, imports and exports play an important role.

How is Bahrain navigating the energy transition?

Bahrain, known as the birthplace of the Arabian Peninsula's oil industry, is navigating the challenges and opportunities of the energy transition. While focusing on renewables production, energy efficiency and sustainability, the kingdom is also leveraging its remaining hydrocarbons resources.

What percentage of Bahrain's population has electricity?

100.0% of the country's population (as of 2021) has access to electricity. In 2021 there were still 186.50 m barrels of recoverable but not yet used crude oil reserves in the currently known deposits of Bahrain. Worldwide, there are still proved oil reserves totaling around 1.7 trillion barrels.
