Panoro Energy ASA is an independent E& P company listed on the main board of the Oslo Stock Exchange with ticker PEN. The Company holds high quality exploration and production assets in Africa with oil production from fields in Equatorial Guinea, Gabon and Tunisia.

Equatorial Guinea CO<sub>2</sub> Fuel Combustion/CO<sub>2</sub> Emissions. In its updated NDC (2022), Equatorial Guinea set a GHG emissions reduction target of 35% by 2030 compared to 2010 levels, instead of 20% in the previous NDC. The GHG emissions reduction target for 2050 is ...

Equatorial Guinea is a Central African country comprising the Rio Muni mainland and 5 volcanic offshore islands. The country economy traditionally depended on three commodities; oil and petroleum which contributes 78% to the GDP and cocoa, coffee, and timber and considered as the third-largest producer of crude oil in sub-Saharan.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

Energy in Equatorial Guinea is an industry with plenty of potential, especially in the fields of oil and natural gas. However, production has been declining in recent years due to under-investment and lack of new discoveries. In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC [1] data.

How is electricity used in Equatorial Guinea? Sources of electricity generation Electricity can be generated in two main ways: by harnessing the heat from burning fuels or nuclear reactions in the form of steam (thermal power) or by capturing the energy of natural forces such as the sun, wind or moving water.
