

Eesti Energi has completed the procurement for its 26.5MW/51MWh BESS, the first of that scale in Estonia, with LG Energy Solution among the successful parties. The battery energy storage system (BESS) will ...

Eesti Energi has completed the procurement for its 26.5MW/51MWh BESS, the first of that scale in Estonia, with LG Energy Solution among the successful parties. The battery energy storage system (BESS) will be built at the Auvere industrial power plant complex in Ida-Viru county and will help balance the country's grid, state-owned utility ...

Baltic Storage Platform, a joint venture (JV), has broken ground on two new 200MW/400MWh battery energy storage systems (BESS) in Estonia. The JV between Estonian energy company Evecon, French solar PV developer Corsica Sole, and asset manager Mirova will develop the 2-hour duration systems, with plans for the first to be commissioned in 2025 ...

Pikkori is the largest energy storage solar park in Estonia, featuring a 2 MWh Huawei battery at its core. The solar park strategically positions its solar panels to face both east and west, meaning electricity is generated over a longer period of time compared to south-facing parks.

Sunly successfully passed Elering's pre-qualification and connected Estonia's first large battery storage system to the manual Frequency Restoration Reserve (mFRR), a prerequisite for joining the pan-European MARI (Manually Activated Reserves Initiative) system.

Construction of the largest solar park in the Baltics officially began November 22, as Sunly's co-founder and CEO, Priit Lepasepp, along with partners, ceremonially installed the first solar panels at Risti, Estonia. The park, which is set to become operational in the fall of 2026, will have a total capacity of 244 MW and generate electricity ...

The EUR100M project, led by Baltic Storage Platform, will deliver some of Europe's largest battery storage complexes with a combined capacity of 200 MW and a total storage capacity of 400 MWh, putting Estonia in the best spot for efficient energy use.

Since 2020 we have completed development and construction of more than 62MW of solar capacity. We have more than 744MW of ongoing projects around Estonia in different municipalities which will be completed by the end of 2024. ...

Estonia solar storage solution

Estonia has laid the cornerstone for what will become the largest battery park in continental Europe, a major step toward synchronising the Baltic power grids with Europe by 2025; the project, led by Evecon, Corsica Sole and Mirova, aims to bolster energy security and support Estonia's transition to renewable energy.

Estonia has laid the cornerstone for what will become the largest battery park in continental Europe, a major step toward synchronising the Baltic power grids with Europe by 2025; the project, led by Evecon, Corsica ...

We are proud to announce that the joint tender of Diotech OÜ and Solar Wheel OÜ, with LG Energy Solution supplying the battery technology won the international procurement of large-scale storage device organized by Estonian national energy company. The capacity of the new storage device will be 26.5 megawatts and 53.1 megawatt hours.

Plans for the Risti energy park also include future storage solutions and wind turbines. According to Priit Lepasepp, the Risti solar park is part of a broader hybrid energy project that combines solar, wind, and energy storage.

Since 2020 we have completed development and construction of more than 62MW of solar capacity. We have more than 744MW of ongoing projects around Estonia in different municipalities which will be completed by the end of 2024. We are also working to incorporate storage systems to provide electricity when the sun is not shining.
