Does Georgia Power offer solar?

From home installation and our buy back program, to non-installation options, our goal is to make solar an option for every Georgia Power customer. Learn more about our behind-the-meter solar programs, including the new Renewable and Nonrenewable Resources (RNR) program, and how to interconnect your system.

How can I support the development of solar power in Georgia?

Sign up now and get the opportunity to support the development of solar power in Georgia by subscribing to a portion of local solar farms. Every month you'll receive energy credits on your monthly bill based on the solar farm's production. Want to become a corporate sponsor? Help make renewable energy available to income-qualified customers.

What is Georgia Power's community solar program?

Georgia Power's Community Solar program gives you the opportunity to support the development of solar power in Georgia by subscribing to a portion of local solar facilities. You then receive energy credits on your monthly bill based on the solar facility's production.

How can I pay for solar panels in Georgia?

There are several ways to pay for solar panels in Georgia. You can make a cash purchase, which often leads to the most long-term value for your money. Alternatively, solar loans and solar lease/PPAs are available to help finance a solar energy system. What solar panels should I install in Georgia?

Does Georgia Power Company offer a solar extension program?

The Public Service Commission Order pertaining to Dockets 4822, 16573, and 19279 states that Georgia Power Company is to provide existing solar participants the option to extend the term of their current Distributed or Utility Scale generation for up to 35 years. Please select from the following options for more information surrounding your program.

Does Georgia offer a monthly discount on a power bill?

A monthly discount is available for eligible senior citizens on their Georgia Power bill. FlatBill is a 12-month contracted rate plan that offers you a fixed monthly bill that will not vary during the year as your usage does. That means no rising bills during summer's heat or winter's cold--just one flat amount.
