As part of its Smart Solar offer, JE is launching a Rooftop Revolution campaign, inviting Islanders to help to build Jersey's on-Island renewable power, which making environmental and cost savings. [Learn More](#)

Government of Jersey are overall supportive of solar and in most cases you can cover upto 90% of a roof plane without seeking permission. If you live within a listed building, listed site or potential building of interest in Jersey you will always require planning permission and we recommend seeking pre-planning advise from the department.

Solar Panels Installation in Jersey. Accredited, Recommended & Approved Solar PV Installers. Top-rated Solar Panel Company. Request a Free Quote Today.

Turn your home into an energy saving asset with Solar PV Technology. Solar Photovoltaic (PV) provides extra on-site electricity, ensuring your regular connection to the power grid. Daylight powers your panels, offsetting grid electricity purchases, saving you money.

Solar thermal panels convert light to heat (more specifically, hot water) and photovoltaic (PV) panels convert it to electricity. Light is available to us every day, to a greater or lesser extent, and both thermal and PV panels produce energy every day, to a greater or lesser extent.

Jersey Electricity has begun offering a roof top solar panel package for customers switching away from oil and gas heating. "The Solar Smart bundle" give households the option of using energy from the sun to heat their hot water system via a rooftop array.

SunWorks have powered more homes with solar around Jersey than any other firm. We are Jersey's only dedicated PV provider so you can be sure of great service and the best suited PV system. 01534 498822 info@sunworks.je

Harness the energy from our own domestic solar installation to power your home's appliances and heat your hot water with our unique Smart Solar offer, when switching to electric heating. Jersey's Rooftop Revolution

Solar electricity is green renewable energy and doesn't release any harmful carbon dioxide or other pollutants. A typical home solar PV system could save over a tonne and a half of carbon dioxide per year - that's more than 30 tonnes over its lifetime.
