Did you know that you can save money and make your home more energy efficient by installing a 3kW solar panel system? These solar PV systems are ideal for medium-sized homes of 2-3 people, or smaller homes with larger energy consumption.

A 3kW solar panel system can be the best choice for a two or three-bedroom household, but it depends on your present and future consumption, your location, and your roof, among other factors. In this guide, we'll explain what a 3kW solar panel system is, how much it typically costs, and how many of your appliances it can usually power.

Although a 3kW solar PV system is under the widely accepted standard size system of around 4kW, you can still save money, make your home more energy efficient and generate an attractive pay-back period by installing a 3kW solar panel system.

A 3kW solar panel system is suitable for medium-sized homes and can generate significant electricity, potentially reducing energy bills to zero. The Small Export Guarantee allows you to earn money by generating excess electricity from your 3kW solar panels, and government incentives like the Feed-in-Tariff can further enhance your savings and ...
