

# Gse solceller Guernsey

Why did kemkenssolar choose the GSE in- roof system?

KemkensSolar chose the GSE IN-ROOF system as it adapts to different types of solar panel, is lightweight and is proven to be watertight. As the panels are built into the roof, as fitters we have a marked preference for this sustainable application from GSE Integration. The product falls totally within our vision of quality and safety.

What is a GSE in roof system?

The special feature of the IN-ROOF SYSTEM is that the solar panels are built into the roof and replace part of the tiles. This means that the roofs maintain their appearance whilst producing sustainable energy. KemkensSolar chose the GSE IN-ROOF system as it adapts to different types of solar panel, is lightweight and is proven to be watertight.

Who is GSE integration?

GSE Integration was established in 2010 in France, and developed within the Groupe Solution Energie, specializing in technical solutions in the field of solar energy and photovoltaics. Since 2018, it has been a subsidiary of TERREAL CREATON Group, which has been specializing in roofing and terracotta products for more than 150 years.

Why should you choose GSE integration?

Since then GSE Integration has proven to be a very reliable partner with good communication, good availability, good service and high quality products. I really value our partnership and our goal is to continue to make the world more sustainable and houses more beautiful at the same time.

What is GSEI's ambition?

GSEI's ambition is the same as ours: to provide our customers with solutions that are always more adapted to the market, at the cutting edge of technology and to best respond to all renewable energy projects! It is therefore obvious for us to collaborate with this major player in residential solar energy.
