

Developer Solek Group is to develop, build and sell up to 200MW of solar in Chile to BlackRock's Global Renewable Power Fund III (GRP III) following the signing of a ...

Guinea-Bissau is a small country in West Africa with a surface area of 36,000 km² and a population of about 1.8 million. It is one of the most fragile countries in Sub-Saharan Africa (SSA), plagued by political turmoil and successive coups

The SOLEK's Leyda photovoltaic power plant will generate 185 GWh of green energy annually, corresponding to the consumption of 23,000 households, and it will save 71,000 tonnes of carbon dioxide per year. The electricity from Leyda will contribute to Chile's ambitious plans to reach net zero emissions by year 2050.

The World Bank has announced that it will support the development of Guinea-Bissau's first solar power plants. Like other West African countries, Bissau wants to use this solution to decarbonise its electricity production and accelerate the electrification of its population.

Developer Solek Group is to develop, build and sell up to 200MW of solar in Chile to BlackRock's Global Renewable Power Fund III (GRP III) following the signing of a new framework agreement.

The SOLEK Group, founded by Czech entrepreneur Zdenek Sobotka, stands as a global leader in photovoltaic energy production and supply since its establishment in 2010. Renowned for ...
