How much energy does Israel use?

Most energy in Israel comes from fossil fuels. The country's total primary energy demand is significantly higher than its total primary energy production, relying heavily on imports to meet its energy needs. Total primary energy consumption was 304 TWh (1.037 quad) in 2016, or 26.2 million tonnes of oil equivalent.

Is Israel phasing out coal?

In 2021, Prime Minister Naftali Bennet committed Israel at the United Nations Climate Change Conference (COP26) to phasing out coal for energy generation by 2025, and reaching net zero for greenhouse gas emissions by 2050. Since Israel's creation in 1948, it has been dependent on energy imports from other countries.
