

Ivory Coast lithium batteries for solar

Will a lithium-ion battery energy storage system be installed in Côte d'Ivoire?

A lithium-ion battery energy storage system (BESS) made by Saft will be installed at a 37.5MWp solar PV power plant in Côte d'Ivoire (Ivory Coast). It is the African country's first-ever large-scale solar project and the batteries will be used to smooth and integrate the variable output of the PV modules for export to the local electricity grid.

How much solar power does Ivory Coast have in 2023?

Ivorian Energy Minister Mamadou Sangafowa Coulibaly has also revealed plans to expand the capacity of the Boundiali plant to 80 MW. According to the International Renewable Energy Agency (IRENA), Ivory Coast had 46 MW of installed solar at the end of 2023. This content is protected by copyright and may not be reused.

Is there a solar power plant in the Ivory Coast?

The first phase of a solar power plant in the northern part of the Ivory Coast has been inaugurated. Financing for the solar power plant in Boundiali was first announced in 2018, while commissioning plans were shared in December 2022.

How will a new power station help Ivory Coast?

In addition to supplying the country with 37.5 megawatts of clean energy, the power station will enable Ivory Coast to avoid the emission of 27,000 tonnes of carbon dioxide annually. Up to 300 construction jobs were created during the construction phase.

How much does the Ivory Coast electricity project cost?

The project, which has a total cost of EUR75.6 million (\$81.8 million), is expected to power 70,000 homes, saving 60,000 tons of CO2 equivalent per year. It is creating more than 300 direct and indirect jobs during construction. The project is part of efforts to diversify electricity production in the Ivory Coast.

Is CIE launching a solar farm in the Ivory Coast?

CIE, the Ivory Coast's state-owned utility and subsidiary of French group Eranove, has recently completed the development of this solar farm in the Boundiali Department, Bangoué Region. The solar power plant is now set to supply clean electricity to 30,000 households in the region. But, its launch date is yet to be known.

In the Bagoué region, Saft will install its Intensium Max High Energy technology. In concrete terms, the company, headed by Frédéric Duclos, will install six containers equipped with lithium-ion batteries capable of storing ...

The 37.5 MW facility, billed as the country's first major solar array, will sell electricity to Compagnie Ivoirienne d'Électricité, a utility in the country.

It will install six of its Intensium Max High Energy containers with lithium-ion batteries. Furthermore, according to Saft, the energy storage system will offer capacity firming and PV smoothing services to the solar plant.

Saft has earlier completed the installation of six Intensium Max High Energy containers, equipped with lithium-ion batteries for storing energy. According to the subsidiary of TotalEnergies, the energy storage system will provide capacity firming and photovoltaics smoothing services to the solar farm.

SummaryOverviewLocationDevelopersConstructionSee alsoExternal linksThe power station has a capacity of 37.5 megawatts, sold directly to the state-owned Ivorian electricity utility company, Société de Gestion du Patrimoine du Secteur de l'Electricité (SOGEPé), for integration in the national electricity grid. The electricity is evacuated via a substation near the power station. The energy generated will power approximately 30,000 homes. In addition to supplying the country with 37.5 megawatts of clean energy, the power station will ...
