Who owns the energy facilities in Kosovo?

Kosovo\* will own the facilities, the ministry added. Economy minister Artane Rizvanolli said the program would back the independence of the national energy system and enable its transformation. The details will be made known after negotiations between the government and MCC, planned for May.

How will Kosovo's Energy System work?

The system will stabilize the fluctuating frequency of electricity, store energy in the early hours of the morning when consumption is low, and connect with solar, wind, or similar power plants. Kosovo\* will own the facilities, the ministry added.

How much does a grant to Kosovo cost?

The compact program for a grant to Kosovo\*, estimated at USD 234 million, consists of two projects: batteries with an installed capacity of 200 MWh, and the development of the workforce and involvement of women in the energy sector, the Ministry of Economy said.

Kosovo has launched two auctions for BESS projects with a cumulative capacity of 170 MW/340 MWh. The 45 MW/90 MWh and 125 MW/250 MWh battery storage procurement exercises are initiated by the United States acting through Millennium Challenge Corp. (MCC) and Kosovo authorities. In 2022, MMC approved a \$202 million grant for these projects.

The battery storage capacity will be larger than 150 MW, and it will secure 200 MWh, Rizvanolli said, as quoted by local media. US grant was initially planned for gas pipeline. Of note, a USD 200 million grant from US agency MMC was planned to develop a gas pipeline from Greece and North Macedonia. But Kosovo\* suspended the project in September.

Kosovo has launched two auctions for BESS projects with a cumulative capacity of 170 MW/340 MWh. The 45 MW/90 MWh and 125 MW/250 MWh battery storage procurement exercises are ...

6 ???&#0183; Millennium Challenge Account Kosovo invited qualified companies to respond to the prequalification call for a battery storage project. The two lots are for 45 MW and 125 MW in ...

The technical storage or access is strictly necessary for the legitimate purpose of enabling the use of a specific service explicitly requested by the subscriber or user ...

A battery storage system will provide Kosovo's TSO Kostt with a capacity of 45 MW (or 90 MWh) which will be used to ensure automatic and manual frequency restoration ...

Synopsis. Following the announcement in 2022 that Kosovo was going to begin building its first battery energy storage systems (170MW/340MWh), this will provide relief to the energy crisis by stabilising the fluctuating frequency of electricity and help integrate other renewable assets onto the grid.

The new public entity will be designed to enable frequency restoration reserves, energy arbitrage, or other potential energy storage services. Multi-Functional Energy Storage Entity (MFES) with its battery energy storage capability will enable integration of renewable energy into Kosovo's energy system and improve security of supply.
