

Monaco solar panel scheme

This website is an interactive map that allows users to easily identify every roof in Monaco, its potential solar resource, the exploitable area on which photovoltaic panels could be installed, and the possible annual electricity production. This means that residents can find out the solar capacity of their building.

In line with this objective, Monaco Energies Renewables has just acquired eight photovoltaic parks, totalling a production capacity of 39 MW_{pec}. This has been distributed in seven departments in the south of France.

The solar resource map is an interactive map available to all via the website. It allows users to easily and effectively identify, for every roof in Monaco, the potential solar resource, the exploitable area on which photovoltaic panels could be installed, and possible annual electricity production.

Monaco has partnered with France to build a massive solar park, marking a major leap towards its goal of sustainable energy. The photovoltaic park, located in France, will utilize the sun's power to generate clean electricity for Monaco, reducing its reliance on ...

The Principality of Monaco has already installed more than 2,000 square metres of solar photovoltaic panels. The Neptune building opposite the Louis II Stadium has a roof made entirely of photovoltaic panels. Photovoltaic panels can be installed on roofs, taking account of shading caused by the environment.

A giant solar power station has been inaugurated on the roof of Monaco's Grimaldi Forum, marking a significant milestone in the Principality's energy transition. Eventually, electricity generated from the station will be used to power the new eco-district.

“M.E.R. aims to make Monaco one of the first States to have 100% green electricity production capacity, equivalent to consumption in its territory,” stated Marie-Pierre Gramaglia, Minister of Public Works, the Environment and Urban ...

This tool enables owners, managing agents and private individuals to access data quickly to help them decide whether to install solar panels on the roof of their building. For more information on the scheme, the steps to be taken and grant applications, see: A report is available on Monaco Channel.

Local schools such as ‘cole du Parc and the Lycée Technique et Hôtellerie are kitted out with solar PV panels, as are office and residential buildings, whilst the Grimaldi Forum and the Monte-Carlo Bay Hotel are about to deploy their own rooftop PV systems.

“M.E.R. aims to make Monaco one of the first States to have 100% green electricity production capacity, equivalent to consumption in its territory,” stated Marie-Pierre Gramaglia, Minister of Public

Monaco solar panel scheme

Works, the Environment and Urban Development.

During a press conference held late in the morning on Thursday 29 June, Marie-Pierre Gramaglia, Minister of Public Works, the Environment and Urban Development, presented two aspects of Monaco's investment in solar power: a solar resource map for the Principality and the launch of a joint venture by the Prince's Government and SMEG to ...
