

What is the high-voltage power link between Albania and North Macedonia?

The high-voltage power link between Albania and North Macedonia will be part of an energy corridor from Bulgaria toward Italy. OST hired Joint Venture Mitas Energy and Doko as the contractor for the high-voltage link almost three years ago. It signed a deal with Greece-based Mytilineos for the substations in April 2021.

Will Albania build a future electricity interconnection with North Macedonia?

Albania marked the start of construction of its section of the future electricity interconnection with North Macedonia. The project for the link between Fier to Bitola is worth just over EUR 70 million on its side. Albania and North Macedonia are working on their first overhead 400 kV power line, which would enable market coupling and direct trade.

Is North Macedonia a state-owned power company?

North Macedonia's state-owned power company was unbundled and partially privatized in the early 2000s. Austrian utility company EVN has been responsible for electricity distribution in North Macedonia since entering the market in 2006.

How many power plants are there in North Macedonia?

The electric power production system in North Macedonia consists of two coal power plants with a total installed capacity of 825 megawatts (MW), several hydro power plants with a total installed capacity of 695 MW, one combined generation power plant, a heavy oil plant, a few solar power plants, a few biogas plants, and one wind power farm.

Did North Macedonia change its energy regulations?

There were no major energy legislative changes, but North Macedonia continued to harmonize its energy regulations with the EU Energy Community's Third Energy Package (TEP). North Macedonia's state-owned power company was unbundled and partially privatized in the early 2000s.

What type of electricity does North Macedonia use?

North Macedonia relies predominantly on fossil fuels (low-grade lignite and gas) and hydropower, and is dependent on electricity imports. The total generation of electricity in 2022 was 5,634 GWh, and another 1,471 GWh was imported to satisfy the total domestic electricity demand.

North Macedonia welcomes investments in the energy sector. The government invites companies to design, build, and operate new large and small hydro power plants, wind, solar, and biogas farms. Companies can also apply for tenders to construct sections of the national gas distribution network.

North Macedonia should finalise the transposition of the required elements of the EU ETS Directive, including the Monitoring and Reporting Regulation and Accreditation and Verification Regulation.

Increasing the share of the energy from renewable energy sources (RES) in the total energy consumption is one of the major strategic objectives of the Government of the Republic of North Macedonia. This is very important for ensuring stable energy supply and energy security, thus creating conditions for

3 ???&#0183; Minister of Energy, Mining and Minerals Sanja Bozinovska said the facilities would produce a combined 46 GWh per year, enough to cover the electricity needs of more than 7,000 households in North Macedonia. "The energy transition represents a vision for the future in which we will have clean energy, a healthy environment, and economic ...

The Q2 2023 ERRA Regulatory Story of the Quarter covers the latest power sector development from North Macedonia being the establishment of the domestic day-ahead exchange platform that serves as the first step towards the integration of the Western Balkans energy market and includes two interviews:
