

Powerup energy technologies Denmark

PowerUP Energy Technologies produces the best in class portable hydrogen fuel cell generators and proton exchange membrane fuel cells. Our technology is based on our co-founders' 15 years of scientific research in the field of fuel cells and energy technologies.

While solar panels and wind turbines are a great source of power, their reliability is limited due to weather conditions. With our miniature smart-grid solutions you can complement your green power generation. If other methods aren't ...

PowerUP Energy Technologies is a company that develops and manufactures energy generation products. It offers electric and portable hydrogen fuel cell-based generators for fuel cell technology markets.

While solar panels and wind turbines are a great source of power, their reliability is limited due to weather conditions. With our miniature smart-grid solutions you can complement your green power generation. If other methods aren't producing enough power, UP's generators will provide the necessary amps.

PowerUP produces hydrogen fuel cell-based generators. These smart generators are sustainable, compact, lightweight, noise-free, odourless and require minimal maintenance. The UP product range has the potential to revolutionize various industries such as medical, marine and construction industries.

PowerUP Energy Technologies is a leading-edge company within the industry, ready to upend the backup power solutions market. In partnership with giant telecom companies like Tele2 and Telia, PowerUP is leading the way towards using hydrogen fuel cell generators as backup power sources, changing the conventional conception of backup power ...

The UP200 integrates fuel cells with pioneering battery technologies to make the generator smart. Form your own miniature smart-grid and go energy independent.

Discover PowerUP Energy Technologies, the leader in portable hydrogen fuel cell generators. Offering sustainable, zero-emission power solutions for telecom, maritime, military, and off-grid applications. Explore clean energy innovations today!

At PowerUP Energy Technologies, we are changing energy generation with zero-emission hydrogen fuel cells. We even recycle aged cells and their materials, but we cannot afford to...

PowerUP Energy Technologies is an Estonian cleantech start-up that produces best-in-class hydrogen fuel cell-based electric generators and proton exchange membrane fuel cells. PowerUP's technology is based on their co-founders' 15 years of scientific research in the field of fuel cells and energy technologies.

Powerup energy technologies Denmark

The goal is to create an integrated hydrogen economy around the Baltic Sea to enable self-sufficiency of energy and minimise carbon emissions from different industries. The project includes 40 partners from nine Baltic Sea area countries.
