

Enel Green Power Romania commissioned the "Lumina photovoltaic park" in southeastern Romania earlier this month.

The first 9,566 Romanians who signed up for the Green House Program can start installing photovoltaic panels. The Administration of the Environmental Fund (AFM) published on Tuesday, January 30, 2024, the first list of ...

Enel Green Power Romania, Enel Group's renewable energy business line in Romania, has commissioned Lumina photovoltaic park in Calugareni, Giurgiu County, and completed its takeover from MYTILINEOS.

Enel Green Power Romania, Enel Group's renewable energy business line in Romania, has commissioned Lumina photovoltaic park in Calugareni, Giurgiu County, and completed its takeover from Mytilineos.

Consisting of 120,000 JA Solar bifacial monocrystalline panels, the solar park is expected to produce 99 GWh a year. It is connected to the high-voltage grid of the concessionaire distribution operator E-Distributie Muntenia and offers the potential for adding energy storage.

Romania is undergoing a significant expansion in solar power within its broader energy transition framework, bolstered by European funding and legal reforms. This upsurge has prompted investments across the spectrum, from individual households as prosumers to utility-scale facilities, with local government units emerging as a significant ...

Enel Green Power Romania has successfully powered up its 63-MW Lumina solar park in the Calugareni area of Giurgiu County in Romania. The facility consists of 120,000 JA Solar bifacial monocrystalline panels and is expected to generate 99 GWh of energy per year.

Romania's Ministry of Energy's first Contracts for Difference (CfD) has awarded 11 solar PV projects with a combined capacity of 432MW. EBRD to support Romania's second renewable power...

Enel Green Power Romania has reached a capacity of approximately 100 MW of its photovoltaic parks, after the commissioning of the Calugareni plant, and approximately 600 MW of total installed capacity in wind and photovoltaic power generation plants in Romania.

Currently, Enel Green Power Romania has an operational green energy portfolio of approximately 600 MW, consisting of wind and photovoltaic projects. The company operates photovoltaic parks with a capacity of

Romania greenpower solar panels

approximately 100 MW in Dolj, Giurgiu and Prahova counties, and is working on similar projects in various stages of development.
