Infinity Power, a joint venture between Egypt's Infinity and UAE's Masdar, announced today the signing of a 20-year Capacity Change Agreement with Senelec, Senegal's national electricity company to supply 40MW through a battery energy storage system (BESS).

Senegal's national electricity company, Senelec, has signed a 20-year Capacity Change Agreement with a private company for 160MWh or 40MW through a battery energy storage system (BESS). Through this energy storage pact system, Senelec can stabilise its electricity grid and pave the way for further renewable energy growth in Senegal.

Senelec, the national electricity company in Senegal, has signed a 20-year Capacity Change Agreement with a private company for 160MWh or 40MW through a battery energy storage system (BESS) in the ...

Senegal's national power utility firm Senelec has recently signed a 20-year capacity change agreement (CCA) for a 40MW/ 160MWh (4-hour) battery energy storage system (BESS) project with clean energy ...

Infinity Power announced the signing of a 20-year Capacity Change Agreement with Senelec, Senegal's national electricity company to supply 40MW through a battery energy storage system (BESS). The system will enable Senelec to stabilise the nation's electricity grid and pave the way for further renewable energy growth in Senegal.

Pioneering West African battery storage project receives nearly \$35m in financing, bringing stability and clean energy to Senegal's grid.

Senelec, the national electricity company in Senegal, has signed a 20-year Capacity Change Agreement with a private company for 160MWh or 40MW through a battery energy storage system (BESS) in the West African country.

The project will provide clean, reliable energy for 235,000 people in Senegal. Largest photovoltaic with added battery energy storage systems (BESS) project in West Africa, accelerating the uptake of critical battery technology in the region. The investment supports Senegal's drive to reach 40% of renewable energy capacity by 2030.

Construction of the battery energy storage system is expected to commence in early 2024 at the Tobène substation in Thies and is expected to become operational in 2025. Once complete, it will be one of the largest of its kind in West Africa, and will help Senegal to avoid approximately 37,000 tonnes of carbon dioxide emissions each year.
