

Seplos bms configuration Yemen

What is seplos technology?

Seplos Technology, with resources for solar battery, home energy storage, bms software free to download.

Is seplos a good BMS?

I must add, for those looking for a BMS, I'm quite happy with the Seplos (10E). Yes It's balancing ability is non-existent and the software can be confusing, but it seems pretty solid.

Does seplos V2 (10E) BMS work with victron?

Check out the comparison spreadsheet for all the details on how to set these parameters correctly. With the right settings, the SEPLOS V2 (10E) BMS works actually pretty good together with the Victron system. The BMS still lacks features like absorption timer and float mode but at least with these settings, it is kind of usable.

Can a 48v battery be used in a seplos Mason box?

I recently built a 48v battery using 16 x EVE LF280K cells and installed in a Seplos Mason box. Its working well, but when battery approaches full charge I get several warnings and then a red warning and the BMS shuts off power.

What is a BMS & how does it work?

The BMS is simply passing information to the control device. The Inverter charger settings must be set INSIDE the limits of the BMS. Example: If the BMS Low Voltage Cut Out is set to 46V then the Inverter should be set to stop drawing power from the battery at 47V to 48V. Likewise for all the other settings.

How many volts can a semplos BMS charge?

Look like I'm on the same journey as you, I have the Semplos BMS which came with my vertical unit and 16 EVE 280 Cells. Did you manage to setup your BMS parameters, I thought your settings in your sheet seemed a bit high. I was only charging to 3.5v per cell which gives a 56voltmax and a safety cut off of 3.65v 58.4v.

Hi guys, Please can anyone help with the parameter settings in Battery Monitor for the Seplos BMS? I recently built a 48v battery using 16 x EVE LF280K...

SEPLOS - Victron Connection. How to set CVL, CCL and DCL through the BMS. By changing the below settings in the SEPLOS BMS configuration, the BMS has full control over the Victron system and can set CVL, CCL and DCL as per your needs.

I thought it might be helpful to compile a definitive list, with explanations, of the parameters in Battery monitor for the Seplos BMS. I'm sure some of your expertise will help correct my guesses and shortfalls and help people in ...
