

What does SES do?

SES helps deliver broadband connectivity and end-to-end video services to rural and remote areas that are often difficult to reach. Take your business to the next level with our innovative hybrid and cloud-based broadcast solutions. Governments around the world increasingly rely on commercial satellite services to meet their networking needs.

When did SES Global become a company?

Based in Betzdorf, Luxembourg and founded in 1985 as Soci  t   Europ  enne des Satellites, the company was renamed SES Global in 2001 and has been simply "SES" since 2006.

Who owns SES satellites?

SES was formed on the initiative and support of the Luxembourgish government in 1985 as Soci  t   Europ  enne des Satellites (SES). The Grand Duchy of Luxembourg remains a major shareholder. In December 1988, as Europe's first private satellite operator, SES launched its first satellite, Astra 1A, to the 19.2   East orbital position.

What does SES stand for?

The business will be combined with SES subsidiary, SES Government Solutions (now SES Space & Defense) to create a "scaled solutions provider serving the multi-orbit satellite communications needs of the US Government" and SES's largest data business segment by revenue.

Why did SES expand?

Geographic expansion went hand-in-hand with the diversification of SES' services beyond just TV broadcasting, to cover telecommunication services for businesses, telecommunications companies and government customers, as well as broadband access and technical consultancy services.

Does SES have a multi-transponder partnership with Sky?

In October 2024, SES extended until 2029 its long-established partnership with Sky to provide multi-transponder capacity at the Astra 28.2  E orbital position to deliver satellite TV to more than 17 million households across the United Kingdom and Republic of Ireland.

We focus on developing hydrogen technologies that go hand in hand with current needs and climate goals in Poland and all over the world. The idea of exploring the potential of hydrogen as an alternative to conventional fuels and its use in the transport, industrial and energy sectors originated in the Sescom Group more than 12 years ago, and ...
