

# Smart grid platform Kuwait

Kuwait Ministry of Electricity and Water (MEW) has chosen Alstom Grid to implement a fully integrated grid management solution for Kuwait town district. The project will include an upgrade of Kuwait town district control center's Energy Management System (EMS), a new Integrated Distribution Management System (IDMS) and an Asset Management ...

KUWAIT CITY, Dec 28: The utilities sector has historically under-invested in information technology (IT), but an increasing number of utility companies in the ...

The smart grid refers to next generation power grids, with multi-directional flows of electricity and information to make a wide distributed network. Through smart grid, the power system becomes smart by communicating, sensing, controlling and applying intelligence.

Through smart grid, the power system becomes smart by communicating, sensing, controlling and applying intelligence. Advances in ...

STC has signed an agreement with the Ministry of Electricity, Water & Renewable Energy (MEW) for the supply of smart electricity meters in Kuwait. The telco ...

Through smart grid, the power system becomes smart by communicating, sensing, controlling and applying intelligence. Advances in power electronics and communication, and emphasis on renewable energy, as well as consumer participation in both production and consumption of electricity are the major drivers in making the power system a Smart Grid.

The consortium is being led by Kuwait telecommunications company Zain to implement multiple smart grid projects which include a smart ...
