

Solaris kit United Kingdom

Who are solariskit?

SolarisKit are the developers of the world's first flat-packed solar collector, a new solar hot water solution that is modern, attractive, simple to install, and easy to ship. Our solar collectors can provide carbon free hot water for homes, hotels, glamping/camping sites, and heating pools and hot tubs and spas.

What is a solariskit solar collector?

The SolarisKit solar collector is modern and sleek in design. Go green in style with SolarisKit. SolarisKit is proudly designed, tested, and made in the UK. We are based at the Michelin Scotland Innovation Parc in Dundee, Scotland.

How does solariskit work?

The SolarisKit solar collectors are connected together to form an array on your roof or ground turning solar energy into heat. The collectors are connected to an insulated hot water storage tank which stores all the hot water over the course of the day. Insulation reduces any heat losses from the tank.

Where is solariskit made?

Go green in style with SolarisKit. SolarisKit is proudly designed, tested, and made in the UK. We are based at the Michelin Scotland Innovation Parc in Dundee, Scotland. The SolarisKit S400 solar collector has been rigorously tested to European standards by accredited test lab SPF in Switzerland.

Can solariskit provide carbon free hot water?

Learn how SolarisKit can provide carbon free hot water for your home or building in 60 seconds. From providing innovative solar solutions to design and manufacturing expertise, SolarisKit is your trusted solar thermal solutions partner.

Is the solariskit S400 a certified solar collector?

The SolarisKit S400 solar collector is fully certified to stringent European standards (ISO 9806 and EN 12975-1). From hail impact to over pressure testing, the S400 solar collector by SolarisKit has been designed to provide you with years of service. Solar Keymark Registration No: 011-7S3049 F, issued by DIN CERTCO on 31/7/2021.

It's also responsible for producing a lot of carbon emissions. A household using 180 litres of hot water per day will annually consume 2,200kWh of energy and produce over 1,000 kilograms of carbon.

From United Kingdom. Maturity stage TRL 6 / 7 - Prototype demonstration 1:1. SolarisKit is ideally suited to provide hot water for households (showering/bathing, cleaning, laundering clothes etc), business (hotels, ecolodges, pool heating etc), and industry (textiles, aquaculture, paper, etc.). It is a device which can be quickly assembled ...
