October 16, 2023 marked 20 years of continuous U.S. presence in Equatorial Guinea and over five decades of bilateral relations between the United States and Equatorial Guinea. Although the U.S. government was one of the first nations to recognize independent Equatorial Guinea in 1968, 2003 was a landmark in our commitment to you, the people of ...

Also read: ExxonMobil's US\$10B deep-water oil boost for Nigeria. Equatorial Guinea's abundant natural resources extend beyond its well-known oil and gas reserves, providing the country with significant economic potential. The nation's vast tropical forests, especially on the mainland, support a thriving timber industry.

SolarLab's facades are equipped with PV cells that generate electricity throughout the day, drastically cutting a building's reliance on grid power. Over time, the energy savings pay back the initial investment cost, turning SolarLab's facades into a net-positive contributor to the building's energy profile.

Solarlab a s Equatorial Guinea

Other pages in section Block G (Ceiba Field and Okume Complex) The Ceiba Field and Okume Complex assets comprise six oil fields offshore Equatorial Guinea. The Ceiba Field is located in 600-800 m of water depth on the slope of the southern Rio Muni Basin approximately 35 km offshore. Oil production commenced in November 2000 [...]
