

Endesa, through its renewable subsidiary Enel Green Power Spain, has been the provisional winner of the fair transition tender in Andorra, obtaining the right to connect 953 MW and the option to confirm up to 1,200 total MW.

The Ministry of Fair Transition of Andorra, a microstate sandwiched between France and Spain, has granted Endesa the provisional 953MW connection rights through its subsidiary Enel Green Power Spain. The proposed project will combine wind, solar, battery energy storage and green hydrogen to help local industry decarbonise.

A la antigua producción de energía con carbón de la central térmica, le sustituirá ahora proyectos de energía solar, eólica, hidrógeno verde y almacenamiento, con una potencia instalada total de más de 1.800 MW de nueva capacidad renovable.

It was home to a 1GW lignite thermal power plant which Endesa closed in 2020, called Teruel, the name of the province it and Andorra are both in. The proposed project will combine wind, solar, battery energy storage ...

Endesa has submitted a project to build a 50-megawatt (MW) photovoltaic power station on the site of the Andorra thermal power station in the province of Teruel to Aragon's Department of Industry, Competitiveness and Business Development.

The future target for solar homes in Andorra is part of a broader renewable energy and social-economic development plan led by Endesa, through its subsidiary Enel Green Power España. This plan includes the development of 10 energy communities, including Andorra and surrounding towns, where self-consumption solar plants will be installed on 40 ...

It was home to a 1GW lignite thermal power plant which Endesa closed in 2020, called Teruel, the name of the province it and Andorra are both in. The proposed project will combine wind, solar, battery energy storage and green hydrogen to help local industry decarbonise. It includes an option to expand the connection to 1,200MW.

The former energy production in a coal-fired thermal power plant will now be replaced by solar, wind, green hydrogen and storage projects, with a total installed capacity of more than 1,800 MW of new renewable capacity.

Endesa SA (BME:ELE) has started the permitting process with the department of industry of the Spanish region of Aragon, seeking approval to build a 50-MW solar photovoltaic (PV) park on the land of the Andorra

Solarx power Andorra

thermal power plant in Teruel province.

The thermal power plant in Teruel (Andorra) has been in operation for more than four decades and has forged a deep-rooted bond with the area. Once Endesa ordered the closure of the plant in 2019, the decommissioning process began with a plan for the future of the region that was presented in detail today and that includes the implementation of ...

The EUR1.48 billion project is set to comprise 1,585 MW of solar generation capacity, 139 MW of wind turbines and a large scale storage system, and will replace coal power plants Endesa wants to...
