

The Netherlands proterra energy

Who is Proterra energy?

Find out more. Proterra Energy specialises in the design installation and maintenance of renewable energy systems. Whether you are on or off-grid we can help you create a system that is reliable, cost-effective, efficient and suited to your needs.

Who are West Coast Croft & Proterra energy?

Highly recommend them! West Coast Croft - Owner Proterra Energy specialise in designing, installing and servicing renewable energy solutions across Scotland both on and off the grid. Engineering Micro Hydro, Solar PV, Wind and Battery Systems.

Where are Proterra batteries made?

Our batteries are designed from the cell level up for commercial and industrial usage and have industry-leading energy density, a flexible design, and ruggedized commercial-grade housing. Designed in Proterra's Silicon Valley and manufactured in Greer, South Carolina, by the best minds in battery engineering.

What makes Proterra a good battery system?

Proterra battery systems are safe, reliable, and efficient. Flexible. Efficient. Proven. A modular design enables customizable battery pack dimensions that can easily be configured to megawatt-hour scale systems that fit within a variety of heavy-duty vehicle platforms.

What is a Proterra S series battery?

The Proterra S series batteries already power medium- and heavy-duty applications on the roads throughout North America. Battery packs in the S series have a width of 860 mm and can contain up to 123 kWh of energy storage per pack.

How can Proterra help your team transition to an all-electric future?

With industry-leading battery solutions, your team can simplify the transition to all-electric future. The Proterra Partnership Journey On a mission to make an IMPACT? © 2024 Proterra. All Rights Reserved. Building innovative battery technologies to power a better, more sustainable world.

Proterra Energy works across Scotland designing, installing and servicing renewable energy systems both on and off grid. We work with a Hydro, Solar and Wind renewable systems as well as battery storage and diesel backup generators to balance performance and cost and create systems suited to our Clients requirements.
