What is Uganda's Energy Transition Plan (ETP)?

While the focus of the report is from now to 2050, the ETP also highlights key steps to further the energy sector's decarbonisation beyond 2050 and estimates at what point the energy sector is poised to reach net zero. Uganda's Energy Transition Plan (ETP) is a strategic roadmap for the development and modernisation of Uganda's energy sector.

What percentage of Uganda's energy is renewable?

While a high percentage of 92% renewable energy in Uganda's total energy supply seems astounding, the figure is a bit more complicated than it appears at first glance. Out of its total energy supply, 92% is derived from renewable sources, with 98% coming from bioenergy.

Is Uganda developing a gas reserve for liquefied petroleum gas (LPG)?

In addition to expanding electricity generation for export to energy impoverished neighbours like eastern DRC, South Sudan, and Rwanda, Uganda is advancing plans of developing its associated gas reserves for Liquefied Petroleum Gas (LPG) production.

UpEnergy also seeded the launch of Community Carbon. Read more here. Community Carbon is a new company that reinvests project revenue into additional activities that help build long-term ...

UCAP Energy Abbreviation. UCAP in Energy commonly refers to Unforced Capacity, which is a measure of the capacity of power generation that is available to meet demand, accounting for outages and deratings. This metric is essential for evaluating the reliability and performance of power plants and the overall energy system.

Alex is an Investment Director at Hesabu. Prior to Hesabu, Alex worked with PowerGen Renewable Energy in the commercial development department and at PwC Deals Advisory where he worked on valuation, due diligence, and M& A services.
