

# Using solar battery unit as ups oem

Yes--using a ups battery with solar can work when panels charge a properly sized bank through an MPPT/PWM controller and the UPS is designed to run from that bank.

If you size the battery correctly, say 3 to 5 days run time, and only use the system for short outings for a couple of days, you can do away with the solar panels.

EnerTech UPS is a global leading manufacturer of solar and power products like hybrid solar inverter, solar UPS inverter, online UPS, and power ...
